

TELEHEALTH SERVICES

## We keep patients connected to local care, virtually.

**We know providing high-quality patient care close to home is your goal. It's our goal, too.**

With 24/7 access and seamless collaboration, together we'll achieve better outcomes and lower costs — without burning out your team.

- 1 We don't wait for the future—we build it.** Agile, collaborative, and obsessed with solving the right problems, we partner with hospitals and health systems to meet their unique needs, effectively improving patient access to high-quality care and reducing costs.
- 2 Integration isn't a buzzword—it's where we thrive.** We embed ourselves with your inpatient teams to deliver seamless patient care, boost retention, and stop burnout before it starts.
- 3 We're always on.** We see patients quickly, keeping them connected to high-quality, local care virtually.
- 4 We don't meet standards—we set them.** We invest the time and resources to remove barriers and elevate patient care and experience.

### MedOne Telehealth Services

**Bed placement/triage:**

We keep care local by quickly triaging patients to the right level of care in the right place—matching patient needs to clinical services available and redirecting patients to appropriate outpatient services.

**Utilization management:**

We are experts at 'site of service,' leading to optimal use of facility resources.

**Admitting:**

Our tele-hospitalists can admit patients quickly.

**Consults/Follow-ups:**

Our tele-hospitalists provide acute care management, remotely.

**Other services:**

We offer a variety of other telehealth services depending on your needs, including physician advising, APP management, and care coordination.

**Dedicated telehealth team:**

We have a specialized tele-hospitalist team of physicians and APPs, including our Chief Executive Officer, our Chief Strategy Officer, and our Telehealth Services Medical Director.

Elevating healthcare.

*Together.*
